

Wallpad demonstration coding rules

Synthetic test rules. This is not the protected protocol attachment.

1. Do not use ``console.log`` in application source. Use a structured logger.
2. Do not use ``eval`` to interpret a received message. Parse and validate fields.
3. A function must contain at most 20 lines.
4. The line length must not exceed 100 characters.
5. All function names must follow camelCase.
